

Electrical Control Valve 3-W Solenoid

The Electrical Control Valve 3-W Solenoid is a high-performance valve designed to provide precise and efficient control of water flow in irrigation systems. It is equipped with a three-way solenoid that ensures fast, accurate operation, making it an ideal choice for automated irrigation and water management systems. Built to withstand harsh environmental conditions, this valve offers long-lasting durability and reliable performance.

Features:

- Three-way solenoid: Provides rapid response and precise flow control.
- Durable construction: Engineered to resist corrosion and wear in demanding environments.
- Energy-efficient operation: Low power consumption for extended use in automated systems.
- Reliable sealing: Ensures leak-free operation under varying pressures.
- Versatile compatibility: Suitable for integration with different irrigation control systems.

Application:

This valve is used in agricultural and commercial irrigation systems where accurate and automated water flow control is required. It's suitable for use in sprinkler systems, drip irrigation, and greenhouse watering, providing optimal water distribution and resource management.

Electrical Control Valve 3-w Solenoid Technical Specification

Model	Diameter	Pressure Nominal(Bar)	Quantity/Box (Pcs)	Gross. Weight/Box
NX20012.1	2"F	10	1	-
NX20012.2	3"F	10	1	-
NX20012.3	3"Flange	10	1	-
NX20012.4	4"Flange	10	1	-
NX20012.5	5"Flange	10	1	-
NX20012.4	6"Flange	10	1	-
